  - a. Highlight new activities and those with potential for neighbor impacts
  - b. Questions
- IV. Updates on previous action items (staff) (5 minutes)

Item #	Date raised	Question or concern	Response or comment	Status
15.1	4/1/14	How can neighbors know when to expect more severe impacts (noise/vibration)? Use location where possible (S, N, E, street). Is there any way to indicate severity i.e., a quantitative measure? The more notice, the more prepared people will be – use email to warn people of changes and impacts.	<i>The email updates are designed to inform and prepare people of upcoming work. They are sent every 2 weeks and include a detailed table outlining upcoming activities on site, the purpose of the work, potential impacts and their location (i.e., northeast of site, south of site), expected duration and whether it is a new activity or an ongoing one. These updates are also placed in the information kiosks on Mapleton Drive and Kenthorpe Way. Dennis stated that schedules change frequently, but neighbors' locations and personal sensitivities also differ – some neighbors feel vibration or hear noise more than others. Report back at 4/15 meeting</i>	Open
14.3	3/18/14	“Vibratory hammer” – process for installing the sheet piles in early February – have you found other methods?	<i>Christian stated that the area for future shoring is on the west side of the existing sedimentation basin and it is to support the new wash water structure. The work was originally scheduled for next year, but it could occur sometime this summer in July/August. The plan for shoring has not yet been determined. Once we have looked at it we will let neighbors know.</i>	Open
