What can neighbors expect during night construction?

During evening work hours, there will be equipment including excavators, loaders and dump trucks in the area. Trucks will deliver and remove materials (pipe, gravel, steel plates, dirt and rock) during the night. Some equipment will be stored in the right of way during non-work hours. All travel lanes will be open to traffic during the day and access to businesses will be maintained.

As work progresses, crews will temporarily patch the pipe trench with asphalt. Steel plates will cover trenches in the roadway. Crews will regularly remove gravel and debris from the road. Permanent paving and striping will be installed once construction is complete and the new pipeline is tested.

Noise and Light Controls

While construction sites are typically noisy, during night construction several measures will be in place to mitigate noise and light for neighbors:

• Crews will use lighting that focuses only on the work area.
• Whenever possible, newer equipment will be used (generally quieter than older equipment).
• Back-up alarms will be disabled and replaced with spotters (crew members) when work is performed in close proximity to residents.
• Whenever possible, stationary equipment such as generators and compressors will be positioned as far away from residents as possible.

Other Work: State Street Sidewalk Improvements

Construction is underway to improve sidewalks on the west side of State Street between A Avenue and B Avenue, which is a partnership between the Lake Oswego Redevelopment Agency (LORA) and five property owners. Improvements include repairing cracked and uneven sections, and incorporating similar design elements as those found on 2nd Street – brick accents, landscaping, decorative railings, street lights and trees. Construction is expected to continue through July 2015.

Lake Oswego · Tigard Water Partnership
sharing water · connecting communities

Summer 2015
Both daytime and nighttime construction is planned for several phases of the new water pipeline through downtown Lake Oswego. Work will occur along portions of State Street, Foothills Road, the Oswego Village Shopping Center, the Old Town neighborhood, McVey Avenue and George Rogers Park. Construction in this area is anticipated to continue through early 2016. This marks the final construction activities for the Partnership in the City of Lake Oswego. Construction schedules are subject to change.

1. State Street / Railroad Tracks

- **Anticipated Schedule:** Summer 2015
- Construction on State Street will occur mostly at night from 8 p.m. - 5 a.m., Sunday - Thursday.
- There will be a 48-hour period of continuous construction activity to install pipe under the railroad tracks, at State Street, just south of A Avenue. This work will occur over a weekend, and lane closures will be in place.

2. Foothills Road / Oswego Village Shopping Center (near Oswego Pointe Apartments)

- **Anticipated Schedule:** Late summer or early fall 2015
- Construction will occur mostly at night, from 8 p.m. – 5 a.m., Sunday - Thursday.

3. Old Town Neighborhood (Durham Street and Ladd Street) / George Rogers Park (including Green Street)

- **Anticipated Schedule:**
  - Old Town: Fall 2015
  - George Rogers Park: late 2015 – early 2016
- Crews will install a cultural resources exhibit in the park, expected in July 2015.
- Daytime construction from 7 a.m. - 6 p.m., Monday - Friday.

4. McVey Avenue / McVey - State Street Intersection

- **Anticipated Schedule:**
  - Oswego Creek Pipe Bridge Construction: Summer 2015
  - Pipeline Construction on McVey Avenue from Erickson to Green Street: late fall 2015 or early winter 2015
  - Oswego Creek Pipe Bridge construction (near McVey Avenue), daytime construction from 7 a.m. – 6 p.m.
  - McVey Avenue pipeline installation, nighttime construction from 7 p.m. - 6 a.m.
  - State Street and McVey Avenue intersection construction (including the Green Street park entrance), nighttime construction from 8 p.m. - 5 a.m.
